Overview: The ActivityChart Lightning Component enables users to create, manage, and track progress for Activities in an Implementation Plan by displaying a Gantt chart view of all the Activities and sub-Activities within that Implementation Plan.

Terminology

Implementation Plan: A planning document that tracks the progress of a project’s implementation. A single Implementation Plan consists of numerous Activities that must be carried out for the plan to be considered complete.

Activity Table: The chart display of all the Activities belonging to a single Implementation Plan. This includes both Activity details and Timeline information for all Activities.

Activity Row: A single Activity displayed within the Activity Table. This includes the Activity details and Timeline information for that specific Activity.

Date Filter: A default filter in which the user can directly select a date range for a specific date field to find matching Activities.

The screenshot shows the Amp Impact interface with the following elements:

- Select Implementation Plan:** A dropdown menu set to "Afterschool Programming".
- Buttons:** "Add New Activity" (blue), "Search" (text input), "Show More Filters" (blue), and "Show by:" (Week, Month, Year).
- Filter Interface:** A red box highlights the "Filter by" section, which includes a dropdown menu set to "Actual Start Date", a "From" date field, and a "To" date field.
- Activity Schedule Table:** A table with columns for years (2018, 2019) and months (DEC, JAN, FEB, MAR). It lists activities with their statuses and progress bars:
 - Finalise programme schedule:** In Progress, with a red vertical line at 21/1/2019.
 - Research outcomes of extracurricular:** Complete, with a blue progress bar.
 - Hire coaches to lead programmes f:** Planning, with a blue progress bar.

Additional Filters: A filter interface that can be customized depending on what Activity fields are used by an organization.

This screenshot is identical to the one above, but with a red box highlighting the "Show More Filters" button in the top right area of the filter interface.

Create an Implementation Plan for a Project

From the *Setup* tab on a Project record, scroll down to the *Implementation Plans* related list and click “New” to create a new Implementation Plan.

- a. Only the *Name* and *Project* fields are required.

A screenshot of the "New Implementation Plan" form. The form has a title bar "New Implementation Plan". Below it is a section titled "Information". There are four main fields: "Implementation Plan Name" (with a red asterisk) containing "Program Recruitment", "Description" (empty), "Owner" (pre-filled with "User User"), and "Project" (a dropdown menu showing "YouthSports"). There is also an "Active" checkbox which is checked. At the bottom right, there are three buttons: "Cancel", "Save & New", and "Save".

- b. *Active* field is required to be TRUE if the Implementation Plan should be displayed in the Implementation Plan picklist for users to view and edit.

A screenshot of a dropdown menu titled "Select Implementation Plan". The menu is open, showing three options: "Program Recruitment", "Program Recruitment" (highlighted in blue), and "Youth Olympics Logistics".

- c. If no Implementation Plan has been added to a Project, then the Activity Table will display text to indicate that the User has not created an Implementation Plan and the *Add New Activity* button will be greyed out.

A screenshot of the Activity Table interface. At the top, there is a "Select Implementation Plan" dropdown menu. Below it, there is a table with a greyed-out "Add New Activity" button. To the right of the button is a "Search" input field and a "Show More Filters" button. Further right, there are "Show by:" options for "Week", "Month", and "Year". Below the table, there is a "Filter by" section with "Actual Start Date" selected, and "From" and "To" date pickers. At the bottom, a red box highlights the text: "No implementation plans have been added to this project."

Add Activities to an Implementation Plan

Open the *Activities* tab to view and use the Activity Table. Below the Implementation Plan picklist are search and date filters, underneath which is the Activity Table.

Select an Implementation Plan from the picklist, and click “Add New Activity” to start building out that Implementation Plan. A pop-up will appear so that a new Activity record can be defined and created.

System Administrator Note: The fields in the popup are defined and can be customized using the `CREATE_NEW_ACTIVITY_POPUP` field set on the `Activity__c` object. Custom fields added to an Amp Impact object cannot be added to this field set, as they will not display in the popup.

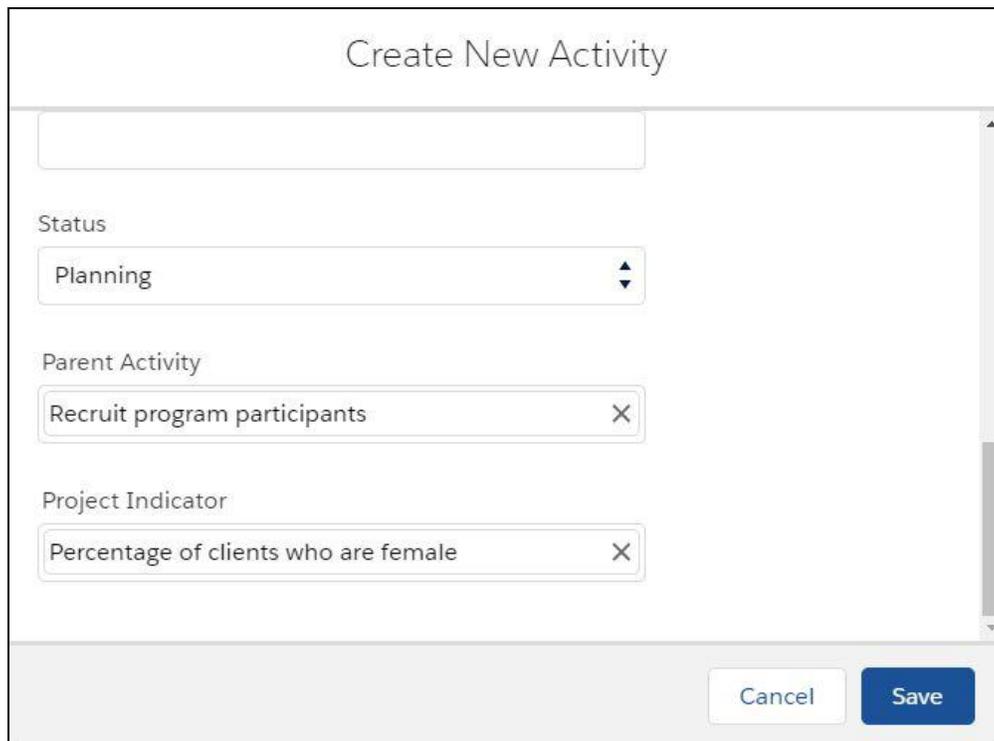

A screenshot of a web-based form titled "Create New Activity". The form is contained within a light gray border. At the top, the title "Create New Activity" is centered. Below the title, there are several input fields: 1. A required field labeled "* Implementation Plan" with a dropdown menu showing "Program Recruitment" and a close button (X). 2. A required field labeled "* Activity Name" with an empty text input box. 3. A field labeled "Description" with a text area containing the placeholder text "Please type here". 4. A field labeled "Type" with a dropdown menu showing "--None--". 5. A field labeled "Planned Start Date" with an empty date input box. At the bottom right of the form, there are two buttons: a light gray "Cancel" button and a blue "Save" button.

- Only the `Implementation_Plan__c` and Name fields are required for the Activity to save successfully.
- For the Timeline bars of an Activity to display, the date fields must be populated.

Amp Impact

- A full bar spanning the entire timeline of the Activity will be displayed if both the start and end dates are populated.
- c. Optionally, Activities can be related to a Project Objective, a Project Indicator, and/or a Contact by filling out the relevant field when creating an Activity.
- The relevant record (e.g. a Contact record) must be created first before an Activity can be related to that record.
 - Once the relevant record is created, the User can click into the field (e.g. Contact) in the popup and select the record from the picklist that is displayed.

Create New Activity

Cancel Save

System Administrator Note: To enable users to create this relationship between an Activity and a Project Objective, a Project Indicator, and/or a Contact, add the field(s) to the CREATE_NEW_ACTIVITY_POPUP and EDIT_ACTIVITY_POPUP field sets.

- d. When a User saves an Activity, a success message will display.

YouthSports

Success! Activity saved successfully.

+ Follow Edit Delete

Actual Start Date

NAME	2018		2019
	NOV	DEC	JAN
Recruit coaches and referees			1/3/2019

- ❑ *Page Performance*: 300 Activities (irrespective of level in the hierarchy, i.e. these can be a combination of parent and child Activities) can be added to an Implementation Plan before the page slows (page load, scrolling, resizing the table, etc. are no longer optimized).
- ❑ *Page Capacity*: 6500 Activities can be added to an Implementation Plan before the page breaks.

View Activities in an Implementation Plan

Activity Name

- The first column, cannot be removed or rearranged in the table. It contains the values of Activity__c.Name, which are hyperlinked in blue. Users can click on the Name, and a new tab will open with the Activity Detail page.

NAME	2018		2019
	NOV	DEC	JAN
Recruit coaches and referees			1/3/2019
Recruit event volunteers			
Recruit youth participants			

- If the Activity Table is viewed in a [Salesforce Community](#), the values in the first column will not be hyperlinked. Users can still modify Activities using the pop-ups in the Lightning Component.

System Administrator Note: The columns in the Activity Table (between the Name column and the Timeline column) are defined and can be customized by the System Administrator using the ACTIVITY_TABLES_COLUMN field set on the Activity__c object. If Activity__c.Status__c is added to the field set, it will always display as the column directly before the Action Icons column, irrespective of its placement in the field set. Custom fields added to an Amp Impact object cannot be added to this field set, as they will not display in the table.

Action Icons

The Action Icons column cannot be removed or rearranged in the table. For each Activity, it contains two clickable icons, a pencil icon for [editing that Activity](#) and a trash bin icon for [deleting that Activity](#).

Activity Dates

The following dates can be tracked per Activity:

1. Planned start date
2. Planned end date
3. Actual start date (referred to in this guide as “start date”)
4. Actual end date (referred to in this guide as “end date”)

Based on these dates, the following formula fields are tracked:

1. Earliest start date - the start date associated with an Activity that happens first - the planned date or the actual date
2. Duration - the number of days tracked for an Activity based on the actual start and end dates.

Timeline Column

The Timeline column cannot be removed or rearranged in the table. The display in this column is controlled by the values in four fields:

1. Planned_Start_Date__c & Planned_End_Date__c
 - If both of these fields are populated, then a grey bar with one end at the Planned_Start_Date__c point and the other end at the Planned_End_Date__c point will display for the Activity.

NAME	2018		2019
	NOV	DEC	JAN
Recruit coaches and referees  			
Recruit event volunteers  			
Recruit youth participants  			

2. Actual_Start_Date__c & Actual_End_Date__c

Amp Impact

- If only Actual_Start_Date__c is populated, then a tick mark will display in the Timeline to represent the single date value.

NAME	2018		2019
	NOV	DEC	JAN
Recruit coaches and referees  			
Recruit event volunteers  			
Recruit youth participants  			

- If both of these fields are populated, then a blue bar with one end at the Actual_Start_Date__c point and the other end at the Actual_End_Date__c point will display for the Activity.

NAME	2018		2019
	NOV	DEC	JAN
Recruit coaches and referees  			
Recruit event volunteers  			
Recruit youth participants  			

- If only Actual_Start_Date__c is populated for a **parent Activity** but the Actual_Start_Date__c and Actual_End_Date__c is populated for at least one of its **child Activities**, then the parent Activity's progress bar in the timeline will display from the parent's Actual_Start_Date__c to the most recent Actual_End_Date__c of its child Activities. This reflects that a parent timeline encompasses child Activity timeline(s). Note: this end date will not display in the popover or end date field in Edit Activity popup since the User has not entered this date for the Activity.

NAME	2018		2019
	NOV	DEC	JAN
<input checked="" type="checkbox"/> Recruit coaches and referees  			
Post on job boards  			
Process applications  			
Interview candidates  			

- 3. The Timeline column also contains a vertical bar that marks the Current Date. This date is also pinned at the top of the Activity Table.

NAME	2018		2019
	NOV	DEC	JAN
Recruit coaches and referees  			 1/3/2019
Recruit event volunteers  			
Recruit youth participants  			

Select an Activity

- The User can click on an Activity row, and the row segment with field values will highlight in grey. This highlight will remain until the User either clicks on another Activity row or reloads the page.

NAME	2018		2019
	NOV	DEC	JAN
Recruit coaches and referees  			 1/3/2019
Recruit event volunteers  			
Recruit youth participants  			

- When the User clicks on an Activity with a Timeline that is outside of the current view of the Activity Table, then the Activity Table will re-render so that the selected Activity’s Timeline will be displayed, according to its Actual Start Date.
 - For example - if the User is viewing a date in 2018 and then clicks on an Activity with an Actual Start Date that falls in 2019, the Timeline will re-render to display that date in 2019.
- If a User would like to see additional information beyond the displayed columns, the User can hover their cursor over either the Activity detail columns or the timeline bars/tick marks for actual dates to see the Activity Name and date values in a popover. The popover displays in the Timeline, adjacent to the relevant Activity. Any date values that are populated will be displayed in the popover.

NAME	2018		2019
	NOV	DEC	JAN
Recruit coaches and referees  			 1/3/2019
Recruit event volunteers  			
Recruit youth participants  			
	Activity: Recruit coaches and referees Start Date: 12/5/2018 End Date: 1/3/2019 Planned Start Date: 12/3/2018 Planned End Date: 1/4/2019		

For example - if Actual_End_Date__c is the only date field left blank for an Activity in progress, then the popover will display the other three fields.

View Parent and Child Activities

- If an Activity has at least one child Activity, a chevron will display to the left of the parent Activity's Name. By default, the Activity's chevron is pointing downward and the child Activities are displayed.
 - The User can click on the chevron to collapse the child Activities, and the chevron will then point to the right.

NAME	2018		2019
	NOV	DEC	JAN
> Recruit coaches and referees  			 1/3/2019
Recruit event volunteers  			
Recruit youth participants  			

- The User can then click again on the chevron to expand the child Activities, and the chevron will again point downward.

NAME	2018		2019
	NOV	DEC	JAN
∨ Recruit coaches and referees  			 1/3/2019
Post on job boards  			
Process applications  			
Interview candidates  			
Onboarding & training  			

Edit and Track Progress on an Activity

To modify an Activity (for example, update its Status or mark the Actual End Date), the User can click on the pencil icon next to an Activity.

NAME	2018		2019
	NOV	DEC	JAN
Recruit coaches and referees			
Recruit event volunteers			
Recruit youth participants			

A popup will open in which the User can update any fields on that Activity.

System Administrator Note: The fields in the popup are defined and can be customized using the EDIT_ACTIVITY_POPUP field set on the Activity__c object. Custom fields added to an Amp Impact object cannot be added to this field set, as they will not display in the popup.

Edit Activity

* Activity Name

Description

Type

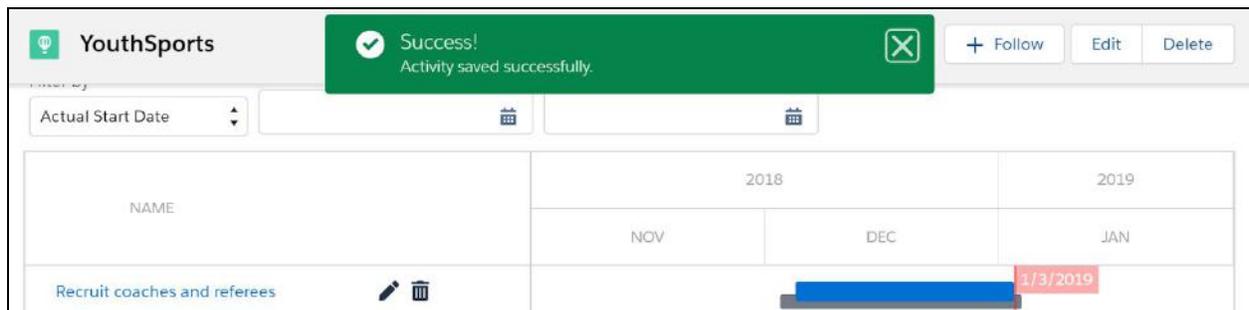

- a. For the Timeline bars of an Activity to display, the date fields must be populated.
 - If both the start and end date fields - either planned dates or actual dates - are populated, then a full bar spanning the entire timeline of the Activity will be displayed.

Amp Impact

- If only one of the planned date fields (i.e. Planned_Start_Date__c or Planned_End_Date__c) is populated, then nothing will display for the planned dates.
- If only the start date field (i.e. Actual_Start_Date__c) is populated, then a blue tick mark representing the populated date will be displayed.
- If only the end date field (i.e. Actual_End_Date__c) is populated, then nothing will display in the timeline for the actual dates.

b. When a User saves an Activity, a success message will display.

The screenshot shows the YouthSports interface. At the top, there is a green success message: "Success! Activity saved successfully." Below this, there is a form with "Actual Start Date" fields. The main part of the screenshot is a calendar view for 2018 and 2019. The calendar shows months NOV, DEC, and JAN. A blue bar representing an activity is visible in the timeline, with a red date marker "1/3/2019" at its end. The activity name "Recruit coaches and referees" is visible in the list below the calendar.

c. The values in the date fields have no impact on the Status__c field (i.e. if the date value of Actual_End_Date__c has already passed, the Status__c will not auto-update to be "Completed"). Automation can be custom built per client requirements to create this field dependency.

Remove an Activity from an Implementation Plan

To remove an Activity from an Implementation Plan, the User can click on the trash icon next to an Activity.

The screenshot shows a list of activities in the YouthSports interface. The activities are listed in a table with columns for NAME, 2018 (NOV, DEC), and 2019 (JAN). The activities listed are "Recruit coaches and referees", "Recruit event volunteers", and "Recruit youth participants". Each activity has a trash icon next to it. A red box highlights the trash icons for the first three activities. The calendar view from the previous screenshot is visible in the background, showing the activity "Recruit coaches and referees" with a blue bar and a red date marker "1/3/2019".

Once the icon has been clicked, a pop-up will appear, requesting that the User confirms the removal of the Activity.

Delete

Are you sure you want to delete this activity from this implementation plan? If you click on "Delete", this activity will no longer appear on the Implementation Plan page, and any sub-Activities will become main Activities.

After the User confirms the removal of an Activity, the Activity is deleted, moved to the Recycle Bin, and no longer displayed in the Activity Table. A success message displays to confirm the Activity's deletion.

If the deleted Activity is a parent Activity, the child Activities are not deleted at the same time as the parent's deletion. After the parent Activity is deleted, the immediate child Activities are displayed as parent-level Activities in the Activity Table. If those child Activities had grandchild Activities before the deletion of the parent, those relationships are preserved (i.e. the grandchild becomes child-level and looks up to the same parent Activity as before).

Sort the Activity Table

Users can click on any of the columns to the right of the Action Icons in the Activity Table to sort the list of Activities.

- a. By default, the Activity Table is sorted in ascending order for `Earliest_Start_Date__c` so that Activities with earlier start dates (either planned or actual) are displayed above Activities with later start dates.
- b. The User can click on the Name column to sort the table in alphabetical ascending order based on Name values. If the User clicks on the Name column a second time, the table will sort in alphabetical descending order.

NAME	2018		2019
	NOV	DEC	JAN
✓ Recruit coaches and refer Interview candidates Onboarding & training Post on job boards Process applications			1/15/2019
✓ Recruit event volunteers Collect volunteer applic Recruit youth participants			

System Administrator Note: The columns in the Activity Table (between the Name column and the Timeline column) are defined and customized using the `ACTIVITY_TABLES_COLUMN` field set on the `Activity__c` object. Custom fields added to an Amp Impact object cannot be added to this field set, as they will not display in the table.

- c. If `Status__c` is displayed in a column, the User can click on the Status header to sort the table in ascending order based on the order of the Activities’ progress, as determined by the picklist values (e.g. Planning, In Progress, Complete). If the User clicks on the Status column header a second time, the table will sort in descending order based on the picklist.

NAME	STATUS	2018		2019
		NOV	DEC	JAN
Recruit youth participants	Planning			1/16/2019
> Recruit event volunteers	In Progress			
> Recruit coaches and referees	Complete			

System Administrator Note: The `Status__c` field’s picklist values can be added, renamed, and reordered, and the sorting of the column based on `Status__c` will reflect those updates. e.g. if you add a “Pending” picklist value between “In Progress” and “Complete”, and subsequently sort the Activity Table by `Status__c`, then the Activities will be sorted as: (1) Planning, (2) In Progress, (3) Pending, and (4) Complete.

- d. For any other fields added to the field set, the User can click on the column to sort the table in alphabetical/numeric ascending order based on the field values, depending on the field type. If the User clicks on that column a second time, the table will sort in alphabetical/numeric descending order.

- e. Sorting occurs primarily at the parent Activity level. If a parent Activity has multiple child Activities when the table is sorted, then those child Activities continue to be displayed beneath the parent Activity, ordered beneath that parent according to the sorting criteria.

NAME	STATUS	2018		2019

- d. To remove this filter, clear out the text entered in the Search Bar and the Activity Table will automatically re-render to display all Activities.

Filter Activities with Specific Start or End Dates

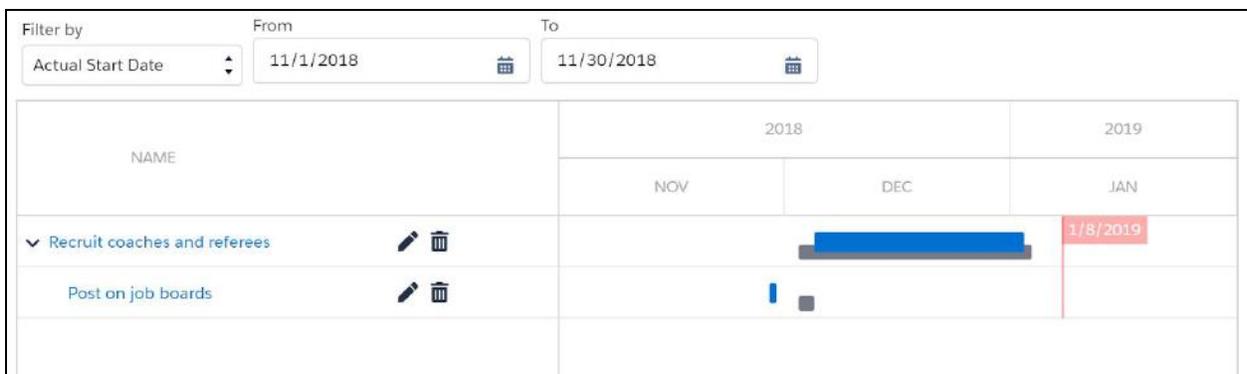

Users can filter the Activity Table based on values in any one of the four date fields.

- a. The User first selects which one of the four date fields will be queried in the filter.

The screenshot shows the 'Filter by' dropdown menu open, with 'Actual Start Date' selected. The interface includes a search bar, 'Add New Activity' button, 'Show More Filters' button, and 'Show by' options (Week, Month, Year). The 'From' and 'To' date fields are empty.

- b. The User then sets the criteria for which two dates the selected field value must fall between. The Activity Table will automatically re-render based on the set criteria.
 - In the example below, the User is filtering for any Activity with an Actual_Start_Date__c that falls between 1 November 2018 and 30 November 2018. Note that the criteria matches a child Activity so the parent is also displayed.

The screenshot shows the 'Filter by' dropdown set to 'Actual Start Date' with 'From' date '11/1/2018' and 'To' date '11/30/2018'. The activity table displays two rows: 'Recruit coaches and referees' and 'Post on job boards'. The 'Recruit coaches and referees' row has a blue bar representing the activity period from late 2018 to early 2019, with a red box indicating the date '1/8/2019'.

NAME	2018		2019
	NOV	DEC	JAN
Recruit coaches and referees	[Blue bar]		1/8/2019
Post on job boards	[Blue bar]	[Grey bar]	

- c. The User can also set only one date as a criterion and the Activity Table will filter Activities accordingly.
 - If the User only sets the From date, then the Activity Table displays Activities in which the date field value falls on or after the set date.

NAME	2018		2019
	NOV	DEC	JAN
	Filter by: Actual Start Date From: 11/30/2018 To:		
✓ Recruit coaches and referees			
Process applications			
Recruit event volunteers			

- If the User only sets the To date, then the Activity Table only displays Activities in which the date field values falls on or before the set date.

NAME	2018		2019
	NOV	DEC	JAN
	Filter by: Planned Start Date From: 12/15/2018 To:		
✓ Recruit coaches and referees			
Post on job boards

Add New Activity | recruitment | Show More Filters | Show by: Week Month Year

Filter by: Actual Start Date | From: | To: |

No activities match the criteria.

- If the filter matches a **parent** Activity, then only its child Activities that match the criteria are displayed.

NAME	2018		2019
	NOV	DEC	JAN
	Recruit coaches and referees	[Redacted]	
Recruit event volunteers	[Redacted]	[Redacted]	

f. If the filter matches a **child** Activity, then the parent Activity is also displayed. Any sibling Activities that do not match the criteria are hidden.

NAME	2018		2019
	NOV	DEC	JAN
	Recruit coaches and referees	[Redacted]	
Process applications	[Redacted]	[Redacted]	

g. To remove this filter, clear out the data criteria(s) entered and the Activity Table will automatically re-render to display all Activities.

The **Date filter** cannot be used in conjunction with any of the other filters. If a second filter is applied after the Date filter has been applied, then only Activities matching the second filter criteria will be displayed. Likewise, if a Date filter is applied after another filter has already been applied, then only Activities matching the Date filter criteria will be displayed.

Filter Activities with Advanced Filters

The User can expand the Advanced Filters panel by clicking the *Show More Filters* button next to the type-ahead search box.

A screenshot of the Amp Impact interface. At the top, there is a dropdown menu for "Select Implementation Plan" with "Program Recruitment" selected. Below this is a blue "Add New Activity" button and a search box. To the right of the search box is a blue button labeled "Show More Filters", which is highlighted with a red rectangular box. Further right are "Show by:" options for "Week", "Month", and "Year", with "Year" selected. Below the search box, there is a "Filter by" section with a dropdown for "Actual Start Date" and two date input fields labeled "From" and "To", each with a calendar icon.

System Administrator Note: The System Administrator can customize which fields are displayed in the Advanced Filters panel by modifying the `ACTIVITY_TABLE_SEARCH_FILTER` field set. Custom fields added to an Amp Impact object cannot be added to this field set, or the Advanced Filters will break.

- a. Once the Advanced Filters panel is expanded, the *Show More Filters* button turns into the *Hide Filters* button. The *Hide Filters* button can be clicked to collapse the Advanced Filters panel.

A screenshot of the Amp Impact interface with the Advanced Filters panel expanded. The "Show More Filters" button from the previous screenshot is now a blue button labeled "Hide Filters", which is highlighted with a red rectangular box. The "Filter by" section now includes a dropdown for "Actual Start Date" and two date input fields. Below this, there are three more dropdown menus for "Status" (with "--None--" selected), "Type" (with "--None--" selected), and "Location". At the bottom of the panel are two blue buttons: "Apply Filter(s)" and "Clear Filter(s)".

- b. The display of the filters depends on the field type:
 - Filters on picklist fields are displayed as multi-select picklists.
 - Filters on relationship (master-detail or lookup) fields are displayed as single-select picklists.
 - Filters on text (text or long text area) fields are displayed as input text fields.

- c. Once the criteria is set, the User clicks the *Apply Filter(s)* button, and the Activity Table re-renders to only display Activities that match the criteria.

A screenshot of the Amp Impact filter panel. At the top, there is a dropdown menu for "Select Implementation Plan" with "Program Recruitment" selected. Below this are several filter sections: "Add New Activity" (button), "Search" (input field), "Hide Filters" (button), and "Show by:" (Week, Month, Year buttons). The "Filter by" section includes "Actual Start Date" (dropdown), "From" and "To" (date pickers), "Status" (Complete dropdown), "Type" (--None-- dropdown), and "Location" (input field). At the bottom, the "Apply Filter(s)" button is highlighted with a red box, and the "Clear Filter(s)" button is also visible.

- d. If no Activities have field values that match the filter criteria, then an error message will display below the Advanced Filters panel, notifying the user that no activities match the criteria.

A screenshot of the Amp Impact filter panel, similar to the previous one, but with different filter values: "Status" is set to "--None--" and "Type" is set to "Planning". Below the filter buttons, a red box highlights the error message: "No activities match the criteria."

- e. To remove this filter, the User can then click the *Clear Filter(s)* button. The criteria in all filters will become blank, and the Activity Table will re-render to display all Activities once more.

Reports and Data Visualization

The following sample reports are included to get users started with data analytics and visualizations. All of these reports are saved and accessible through the “Amp Reports” folder in the Reports tab.

1. Activities by Project Objective

This is a sample report with Activities grouped by Project Objective, which are then grouped by Implementation Plan. This report indicates progress towards any Objective(s) based on Activities completed as well as which Objective(s) will be achieved by a particular Implementation Plan.

2. Activities and Financials by Project

This is a sample report with Financials summed and grouped by category and by Activities, which are then grouped by Implementation Plan. This report can be used to track the planned and actual expenses related to an Activity for financial budgeting and planning purposes.

3. Activities by Project Indicator

This is a sample report with Activities grouped by Project Indicator, which are then grouped by Implementation Plan. This report shows which Activities are related to which Indicators within an Implementation Plan.

Frequently Asked Questions

While using this feature, users may have some questions about how it works. This section documents some of the frequently asked questions.

Tracking Activity Dates

Q: How will my Planned Date Bar display if I don't have a planned end date?

A: Planned Date Bar does not display if only planned start date is populated.

Q: How will my Activity Timeline display if I enter an end date but no start date?

A: Without a start date, the end date will not be displayed in the timeline. The popover that displays dates will also not display the end date.

Q: What is the Duration value if my Activity starts and end on the same date?

A: The Duration will be 1 (day).

Q: What is the Duration value if my Activity has a start date but no end date?

A: The Duration will be 0.

Selecting and Viewing Information

Q: How do I highlight an Activity row?

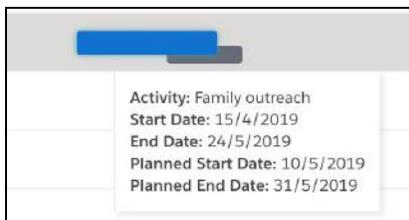

A: User can either

1. Click on any Activity row and it will be highlighted in grey, even when the user is not hovering their cursor over the row.

Or

2. Hover on any Activity row and it will be highlighted in grey. However, only the segment of the row until the Action Icons will be highlighted; not the Activity Timeline.

Q: How do I view the *Date* popover?

A: *Date* popover displays when:

- 1) User hovers over the blue bar showing Actual Start and End Dates
- 2) User hovers over an Activity in the Activity row.

Note: It does not display if User hovers over the grey bar showing Planned Start and End Dates.

Q: Will my Community users also see a hyperlink for the Activity Name to open and view the record?

A: Community users do not see the hyperlink. They can only update and edit the Activity from the *Edit* icon displayed in the Activity Table.

Q: Can I control which column the Status field is displayed in the Activity Table?

A: The Status field will always display in the Activity Table as the last column before the Action Icons (*Edit*, *Delete*). The order of all the other fields in the ACTIVITY_TABLE_COLUMNS field set can be controlled by the User, except the Status field.

Q: When I click on an Activity row in the Timeline, what happens to the Activity Table display?

A: The Activity Table re-renders to display Activities based on the Actual Start Date values. If an Activity is still in the planning stages, the Actual Start Date is blank. Clicking on an Activity row in the Timeline does not re-render it by the Planned Start Date.

Sorting fields in the Activity Table

Q: How does the Activity Table display if I sort by a field with null (blank) values for some Activities?

A: Activities with null values in the sorted field will display towards the top of the table (depending on the level of hierarchy), as they are considered alphabetically/numerically first in the list.

Q: If I have multiple child Activities for a single parent Activity, and one of the child Activities has a null value (i.e. it is blank) for the field we are sorting by, how will it display? For example, I sort the Activity Table by the Location field, and one child Activity does not have a Location.

A: Sorting occurs primarily at the parent Activity level. If a parent Activity has multiple child Activities when the table is sorted, then those child Activities continue to be displayed beneath the parent Activity, ordered beneath that parent according to the sorting criteria.

In the example provided, the parent Activities will be sorted in alphabetical ascending order based on the value in the Location field. If any of those parent Activities have more than one child Activity, those child Activities are listed below the related parent Activity and sorted in alphabetical ascending order. This means that the child Activity with no Location would be displayed directly beneath the parent Activity, as it is alphabetically first.

Q: The Activity Table default view onLoad is by Date (Earliest_Start_Date__c). How will this display if multiple Activities have the same date value?

A: If multiple Activities have the same value in Earliest_Start_Date__c, then those Activities will be sorted in order of descending CreatedDate value (i.e. the more recently created Activity is displayed by default before the earlier created Activity if they both have the same Earliest_Start_Date__c value).
